

Disco is the friendliest, most loveable fish in the sea and part of the OceanChamps™ along with his friends Ashlan and Philippe Cousteau. His home is on a coral reef or rock ledge in a Marine Protected Area in Belize. Nassau Grouper like Disco can grow to be up to 4 feet long! His large size may seem intimidating at first, but all he really wants is a scratch under the chin and maybe a quick dinner of crustaceans or other small fish. Use your imagination to color Disco and draw his home on the reef!
